# Assignment for UI Designer

The Dashboard mockup that we've provided you is a replica of our Product Dashboard. This mockup has to be converted in Angular 7 using the actual data.

Note : Do not use jquery plugins or Bootstrap

Details:

- Convert the Dashboard Mockup using Angular 7.
- You can use Material UI but do not use Bootstrap.
- The Dashboard has the following four sections-
  - Overview
  - Calendar
  - Trend Analysis
  - Workroom Updates
- **Overview**:

- ○ In the overview section show categories upto three levels. Clicking on the first level category will display the second level and so on. (As displayed in the image).
- **Calendar**:
  - ○ Calendar displays the responsibilities which are due on that particular date. After clicking on the time-stamp, three buttons *'Done'*, *'Need More Time'* & *'Cannot Comply'* will be available.
- **Trend analysis**:
  - ○ Use google chart to show the data.
- **Workroom Updates**:
  - ○ Do not use random texts, please use the same texts as given in the image.
- For Menu icons you can use Material UI icon list.
